

TECHNICAL DATA SHEET

ADDIVIC-MB PA3066

Carbon Black Master batch

Product Description	ADDIVIC PA3066 is carbon black master batch with PA6 carrier.
Product Application and Properties	ADDIVIC PA3066 is designed for polyamides to prevent brittleness since the low carbon black content and high dispersion properties.
Typical Properties	Appearance: Cylindrical pellets Melting range > 220°C
Dosage	2% loading
Processing	Polyamide resin mixes 2% PA3066 to mold directly. Polyamide resin include molding grades, nucleation grades, glass fiber grades, impact grades
Safety	Green environment, MEET No-Halogen requirement
Packing	25KG Al/Plastic bags
Storage	Pls seal the bag to prevent moisturizing if you open it but not use up.
Color Change	BLACK

Attention: The information is collected by company technology development and experience. Information are for customers to refer. We will not take the responsibility for customers' application specification. The free samples are provided to customer to test.
